This volume contains selected articles presented at the International Scientific Conference "Jahorina business forum" held at Faculty of Economics Pale on May 13th – 16th, 2024. It is very important to stress out that, besides the appropriate level of quality of scientific papers received, the Editorial Board had an additional criteria in the process of selecting papers. The focus was on papers the content of which could contribute to the theory and practice of local economic development in general.

The journal publishes the papers of the scholars from the Faculty of Economics in East Sarajevo and outside the Faculty as well. The papers refer to the broad area of economic science, and their main prerequisites are scientific contributions to economic theory and practice. The papers can be of theoretical and methodological-analytical nature, and may include areas ranging from national economic policies to business policy. Manuscripts are written in English language.

Needless to say, any papers that you wish to submit, either individually or collaboratively, are much appreciated and will make a substantial contribution to the early development and success of the journal. Best wishes and thank you in advance for your contribution to the scientific journal „Proceedings of the Faculty of Economics in East Sarajevo”.
